

Hydraulic Bar Cutters & Bar Benders

Why Ogura Bar Benders & Cutters?

The Ogura range of Hydraulic Bar Cutters and Benders are extremely reliable, powerful and easy to use. Both battery-powered and mains-powered tools are available.

Able to cut up to 38 mm and bend up to 32 mm rebar, the Ogura range is powerful, safe to use and proven to be robust.

Vimpex are European distributors for the Ogura range of tools and hold stock of the entire range.

Vimpex are committed to supporting customers and dealers with a high level of after sales service.

Our spares, repairs and servicing operation is all managed from our purpose-built workshop. Whether you are an existing customer, or new dealer, you can rely on our prompt service and quick supply – wherever you are.

Li-Ion Battery Technology

A number of the battery-powered Ogura tools use the amazing Makita 18 V Li-Ion battery.

Recent tests by Ogura prove that the new Li-Ion units suffer a discharge rate of only 9% after 500 days in storage! Ogura are the only manufacturer of portable hydraulic tools with access to Makita batteries. Tests prove that the batteries used on Ogura tools have at least twice the life of other power tool batteries.

Intelligent charging means that each individual battery has its own charge profile dependent on use. This extends battery life, increases durability and means 30% more cuts per charge. Recharge time is only 22 minutes.

Leasing Finance

We can offer leasing as a purchase option on the majority of the products we supply. Thanks to our collaboration with specialist providers we are able to offer very low rates.

Please contact us for an immediate quotation.

Bar Cutters

A range of mains and battery powered portable rebar and threaded bolt cutters.

Overview: Page **3**

Bar Benders

A range of versatile bar benders that are capable of bending up to 32 mm high tensile rebar.

Bending Angle	0 - 180°
Bending Speed: 180°	9 sec.
Weight	94.9 kg
Dimensions LxWxH	540 x 466 x 441 mm
Standard	Roller No.s (B25, 425, 422, 416)
Accessories	Collar No.s (425, 422, 419, 416, 413, 525, 522, 519) Hex wrench 2, 8, 17 mm Double-ended spanner (17 / 19 mm) Screw driver & tool box

Battery Powered 20, 25 and 38 mm Rebar & Threaded Rod Cutters

These versatile cutters maintain thread profile in rebar and stud and allow rebar rod to be flush cut to a surface, with only 2-3 mm showing and no burrs.

These tools use specially designed carbide-tipped cuttings discs, which reduce noise, vibration and sparking, and allow up to 38 mm rebar and stud to be cut whilst maintaining the profile to allow nuts and couplings to be attached without re-work or thread cleaning.

The cutting disc is fully enclosed to enhance safety and to channel the few sparks that are produced. A jaw ensures minimum movement of the profile whilst cutting - up to 3000 cuts per disc.

The tool uses the most modern and up to date Makita brushless motor technology and rechargeable 6.0 Ah* Li-ion battery (supplied separately), which ensures low maintenance and maximum cuts per charge (up to 240 on 10 mm bar).

*shipping restrictions limit to 5.0 Ah batteries for export.

Maintains thread profile in rebar and stud

Rebar rod can be cut flush to a surface, with only 2-3mm showing

Carbide-tipped cuttings discs reduce noise, vibration and sparking
